

# Keep What Works. Add What's Next.

ASEE Flow: A Future-Proof  
Alternative to Camunda 7 CE

 **ASEEFlow**

Camunda 7 Community Edition (CE) has long been a trusted tool for managing business processes, but it reaches end-of-life in October 2025. Without updates or support, continued use—especially in regulated sectors like finance or telecom—risks non-compliance with regulations like DORA and NIS2, which mandate actively maintained and supported software.

## What Are Your Options?

If you're using Camunda 7 CE today, you essentially have three paths:

1

Migrate to Camunda 8, a new platform based on different technology. It requires rebuilding workflows, retraining teams, and adapting your architecture.

2

Upgrade to Camunda 7 Enterprise Edition, which extends support but comes with high licensing costs and vendor lock-in.

3

Switch to ASEE Flow, a compatible and supported alternative that lets you keep your existing setup — without the cost or complexity.

## Why Choose ASEE Flow

ASEE Flow is more than a fork. It's a continuation of the technology foundation you already rely on — with added support, stability, and flexibility. It was developed by ASEE, a long-time Camunda implementation partner, to support production-grade environments in finance, government, and beyond.

## Here's why organizations are choosing ASEE Flow:

### Keep Everything You've Built

No need to rework your BPMN models, APIs, or connectors. ASEE Flow is fully compatible with your existing Camunda 7 stack. You don't need to change your infrastructure, retrain teams, or accept downtime.

### Stay Compliant with DORA & NIS2

ASEE Flow includes formal support, regular security patches, and maintenance releases — key requirements for complying with upcoming EU regulations. You can prove your systems are actively supported and secure.

### Backed by a Proven Technology Partner

ASEE Flow is developed and supported by ASEE, a trusted enterprise software provider with decades of experience in mission-critical systems. You benefit from flexibility with the confidence of a stable, reliable vendor behind it.

### Deploy on Your Terms

Run ASEE Flow in your on-premise data center or private cloud — you maintain control over your architecture and data. We meet you where you are.

**It's your process. Let's keep it running — better than ever.**

A Future-Proof Alternative to Camunda 7 CE

**ASEEFlow**

## Built by Experts, Backed by Experience

ASEE has been working with Camunda in complex environments for years. We built ASEE Flow to support our own critical projects — and now we're offering it to teams who want to move forward without disruption.

The end of Camunda 7 CE doesn't mean you have to start over. Let's talk about how ASEE Flow can keep your workflows running — securely, reliably, and without surprise.

**ASEE** stands as one of Europe's leading IT companies specializing in the development and deployment of proprietary software solutions. With a diverse portfolio spanning various industries, including finance, telecommunications, public government, and payment systems, ASEE is at the forefront of innovation.

With a global presence in 23 countries and a dedicated team of over 3,800 professionals, ASEE Group is committed to delivering cutting-edge technology solutions to meet the unique needs of its clients across industries.
